<b>Physical Education Equipment List and Specification - DPE</b>

<b>Standards, Specifications and Conditions</b>
Schools should tender and select the PE Supplier before practical completion and hand over to allow adequate time for co-ordination between the PE Equipment Supplier and the Main Contractor/School Authority.
All equipment shall be durable and safe for school use. Equipment wholly or partly funded from public funds is subject to inspection by officers from the Department of Education and Skills.
<b>It is essential that tenders and tenderers for equipment for school use shall:</b> <ul style="list-style-type: none"><li>• Comply fully with the specifications and be durable and safe for school use.</li><li>• Comply fully with the standards as detailed and shall comply fully with European Standards (EN), both established and developing.</li><li>• Comply with European electrical standards and CE marking as appropriate.</li><li>• Fully comply with requirements in the Request for Tenders (RFT) document.</li><li>• Be accompanied by documentation of sufficient detail for full evaluation.</li><li>• Include the completed and signed certificate of compliance.</li></ul>
<b><u>Award of a contract is conditional on the production of a current tax clearance certificate.</u></b>
<b>Failure to comply with the above may result in the tender being deemed null and void.</b>
<b><u>Important:</u> Equipment of Consumer quality (light duty home use type equipment) is NOT SUITABLE for School Use.</b>

**Fitness Studio  
Descriptions and Specifications**

**All costs to include supply, delivery, installation and commissioning of the equipment**

**Specification for Fitness Equipment -- Resistance**

**This Specification is common to all Resistance Equipment.**

**Standards: I.S. EN 957-1 and I.S. EN 957-2.**

**Each individual piece of Equipment in this range may weigh up to 200 kg.**

**Floor and floor finish to be determined accordingly.**

**Construction – Durable heavy-duty suitable for commercial use.**

Steel frame with a minimum of 2.5 mm wall thickness.

Sections to be 50 x 50 mm, 75 x 50 mm, or 100 x 50 mm as appropriate.

**Selector shaft** – should be at least 25 mm solid cold rolled chrome steel, secured to a solid steel cap plate to provide free-floating movement of weight plates on guide rods.

**Cams** – should be at least 4.5 mm spun steel, with a deep groove for stable cable seating. Variable resistance cams should be bio-mechanically set for each muscle group enabling the taxing of the muscles equally throughout the range of motion.

**Pulley wheels** – Fibreglass reinforced nylon pulley wheels e.

**Cables** – should have breaking strength of at least 900 kg, 3mm US Military Specification lubricated steel aircraft cable, nylon coated to at least 5mm for durability .or equal approved

**Guide Rods** – at least 25 mm steel guide rods to allow free floating Movement of weight plates

**Bushings** – Self-lubricating bronze bushings at pivot points to provide Smooth movement and precision alignment.

**Weight plates** – should be at least 25 mm thick cast iron plates with 2 free-floating bushings in each weight plate to ensure smooth travel.

**Enclosure** – All weight stacks shall be enclosed for safety reasons.

**Selector Pin** – Should allow for safe and ease of weight selection.

**Pads** – Pads should be at least 30 mm high-density urethane foam over 20 mm exterior grade plywood. All bolt connections should use a steel, 10 mm threaded insert.

**Vertical Seat Adjustment** – should provide stable seat placement.

**Foot Platform** – should enable the user to brace the body thereby increasing proper exercise form And provide lower back support.

**Frame** – Upright frame should be 75 mm x 40 mm x 2.5 mm (or equal approved) with a combination of other heavy structural tubular steel. .

**Frame finish** – Durable low maintenance Electrostatic powder coating.

**Instruction Manual** - Step by step instructions with anatomical drawings.

**Warranty** – Life-time on welds, weight plates and guide rods. 5 years on bronze bushings, sealed bearings and pulley wheels. Other parts 3 years on parts and labour, except for cables and upholstery which are to be 1 year.

**Warranty Conditions-** Warranty to be subject to Manufacturer's recommendations in relation to routine maintenance being carried out on a weekly, monthly and annual basis, as required. Warranties to be valid for the following usage rates: **treadmills and rowers 400 hours per annum and 350 hours per annum for all other machines.** Usage to be read from the machine 'records' by the service technician.

**Costs tendered to be inclusive of any servicing required by the manufacturer during the warranty period.**
